

Assured NATO Interoperability.

With the precision capability to detect, identify, and track time-sensitive targets, General Atomics Aeronautical Systems' Predator-series unmanned aircraft systems (UAS) provide proven, flexible, and cost-effective unmanned aircraft for real-time intelligence, surveillance, and reconnaissance.

Predator-series aircraft provide unparalleled support and persistent situational awareness to coalition forces. Their electro-optical/infrared (EO/IR) systems stream real-time video, day and night, and their Lynx Synthetic Aperture Radar/Ground Moving Target Indicator (SAR/GMTI) systems provide wide-area surveillance and all-weather imagery. Flown by the U.S. Air Force, Italian Air Force, and the Royal Air Force, Predator-series aircraft ensure immediate NATO interoperability supporting coalition operations.

Predator-series UAS: Maximizing affordability, reliability, performance, and situational awareness.
